

# ADITHYA C

## Python Full-Stack Developer

+91 8848697024 | adithyaaneesh29@gmail.com | [Github](#) | [LinkedIn](#) | Kannur

Industry-ready Python Full-Stack Developer with hands-on experience in **React.js**, **Django**, **REST API development**, and **MySQL**. Skilled in building responsive, accessible, and performant web applications from front-end to back-end. Experienced in version control with **Git** and **GitHub**, collaborative development, and delivering production-ready features. Strong problem-solving skills with a focus on scalable code, secure authentication, and data-driven user interfaces.

## EXPERIENCE

**Maitexa Technologies Pvt. Ltd.** | *June 2025 – Present*

### Python Full-Stack Developer Intern

- Developed a **responsive login module** using **React.js**, **HTML**, **CSS**, and **JavaScript**, improving user authentication experience.
- Implemented **secure REST APIs with Django** for backend functionalities, integrating with PostgreSQL for efficient data storage.
- Debugged and resolved production and development issues, enhancing system performance and stability.
- Collaborated with team members using **Git and GitHub**, managing pull requests and resolving merge conflicts.
- Contributed to **end-to-end feature development**, including testing, deployment, and optimization of web applications.

## PROJECTS

**Life-Link** (Django, Python, Bootstrap, Matplotlib, Pillow)

- Built a **role-based web app** for managing blood donations, donors, patient and hospital requests. Implemented **secure authentication**, **profile management (Pillow)**, and **real-time analytics** using Matplotlib.
- Enhanced user experience with a **responsive Bootstrap UI** and optimized **database design** for efficient inventory management.

**Urban Tote Co.** (React.js, CSS, Vercel)

- Built a responsive **e-commerce web app** featuring product listings, cart, and checkout with **React Hooks** for state management.
- Deployed using **Vercel** with optimized performance and seamless user experience.

[GitHub](#) | [Live Demo](#)

### Organic Store (HTML, CSS, JavaScript, GitHub Collaboration)

- Collaborated with a team to design an **e-commerce website**, implementing responsive layouts and reusable components.
- Managed code contributions via **Git and GitHub**, resolving merge conflicts and ensuring smooth version control.

[GitHub](#)

### React Landing Page (React, JavaScript, CSS)

- Built a **dynamic single-page application (SPA)** with **reusable components**, optimized for performance and deployment.
